

# Dubai

Where the West meets the East

Home of the World's tallest building and the largest shopping mall in the world, Dubai likes to think BIG. From hosting some of the best restaurants in the World to hotels built on artificial islands, Dubai is a blend of innovation and luxury like nowhere else. All year round sunshine coupled with fabulous beaches, water parks and water sports means that this city is more than just a concrete jungle. Additionally, visitors can visit the old town where traditional fishing boats can still be seen and offer trips out onto the Red Sea. Marine life is abundant in this area and if swimming with sharks or exploring corals sounds like your idea of heaven, heaven is right here. If the everyday facilities were not enough, Dubai is hosting the 2020 World Expo with technologies from almost every country in the World being showcased.
