

# Living beyond the stars

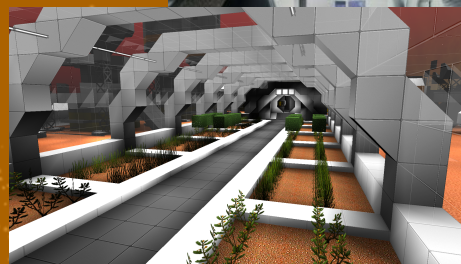

## **Mission:**

Design a home on Mars as a prototype for future colonisation of exoplanets

## **Variables to consider:**

What will humans need to provide in order to survive on a hostile planet?

- |    |    |
|----|----|
| 1. | 4. |
| 2. | 5. |
| 3. | 6. |

## **Labelled Design:**

What is definitely needed as your basic design then add detail? What might be available on Mars that could help you and what will you have to create/recycle yourself?
